Code Self-Portrait

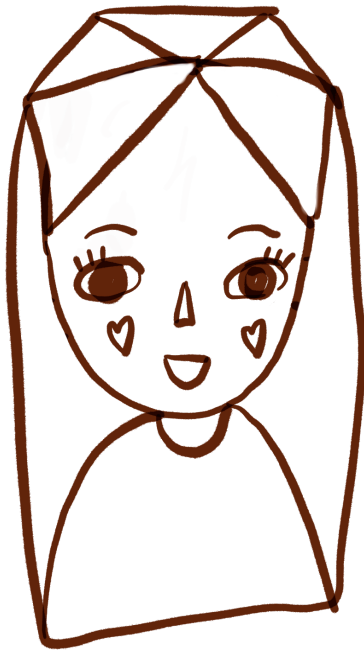

## Re-state the Assignment

Convert the previous Code Self-Portrait into p5.js and add at least 3 basic emotions using the state machine.

## Interaction Diagram

## Hand-drawn sketches

## **Reflections**

Creating a state machine was difficult as I had no coding experience prior to this class. However, it started to make sense after the first emotion was done. The in-class coding session was very helpful, as I got to see other's people work and ask questions as I work on the assignment. I feel satisfied with what I was able to create and excited to learn more.
